Greetings, Fibi Users.

Based on feedback, this afternoon ORIS has made adjustments to Fibi notifications that have been problematic for many of you. Tomorrow, if problems persist, please contact us with an example of the notification so we can further diagnose.

Remember that Fibi also allows turning off notifications that users find redundant or unhelpful. To do so, click on the gear icon on the left of the dashboard. There you will see the toggle to turn notification types off.

Regards,

The ORIS Team
