Greetings, Everyone.

We are now at a point in Fibi Implementation where we'll be moving more into enhancement prioritization, implementation and testing, rather than focusing on fundamental implementation activities. Therefore, it is a great time to begin the work of the JHU Fibi Functional Council. Earlier, some of you'd indicated an interest in participating in this group. We also have added some additional people who have been instrumental in testing and feedback since we went live. We hope you will all participate.

We'd like to gather the group, as many as possible, to begin formulating our purpose and processes. To that end, below is a link to a very quick survey to gather participants' availability for this first meeting. Please click the button below to complete the survey as soon as possible.

[SCHEDULING POLL](#)

Thank you,
Ellen Morthole

PS: FYI, below is the text of the original invitation, explaining the concept of the Fibi

Functional Council:

Greetings!

As you know, Fibi launches this October 23, 2023. Software, once launched, never stays the same; bugs are found, pain points and enhancements identified. When these issues arise, it falls to us to prioritize and determine the construction of new functionality to pass on to our developers at Polus Software Solutions. In order to perform this duty in a representative fashion for our enterprise-wide tool, ORIS seeks to create a **Fibi Functional Council**. **Will you consider joining this group?**

You have been identified as a potential Functional Council member because you've either gained Coeus Expert status in the past, been active in Fibi User Acceptance testing or hold a position at the university with a unique and necessary point of view.

If you are interested in participating, please let us know by Friday, October 13, 2023. At this stage, we are gauging interest in participation; indicating interest is not a formal acceptance of responsibility but will keep you in the loop as ORIS continues to develop the shape and format of the group, it's gatherings and governance.

Thank you for considering this opportunity! If you know of any others who would make a good addition to the Fibi Functional Council, please feel free to nominate them!
