Greetings, Fibi Users.

Fibi 5.5 is now live on our production website. This upgrade includes several important new features along with an entirely new module: Fibi Agreements.

Important to know:

- Aside from seeing the Agreements tab and enjoying the enhancements, you will not need to change how you work in any way. Most users will not be able to access this tab at this time.
- The Agreements module is debuting with a limited pilot of JHURA and SOM (RASP) personnel. In the coming months, additional aspects of the module will be available and users added.
- Please attend the Thursday Fibi Bits session if you want to see a demonstration of the new Agreements module. As usual, you can join the session from the ORIS calendar, or you can register for it to put it onto your calendar.

Thank you to the many employees across our user community who took the time to test and retest this enhancement before going live. Your contributions are truly appreciated!

Regards,

The ORIS Team
